

GETTING INVOLVED

As part of the project we will be developing a derelict site, transforming it into a growing space of accessible raised beds. This will be home to a variety of fruit, vegetables and herbs freely available for anyone to pick.

This project is open for anyone to take part in, regardless of your ability. The design of the garden is intended for ease of access, allowing people of all ages and fitness to take part. If you have never lifted a trowel in your life then now is the perfect time to seize the day.

The variety of courses on offer will be taking place across a number of sites. Our Hazel Tree demo will be in Battery Place, whilst other courses take place at the West Church site or at Bute Produce community garden.

Once you have developed the skills and knowledge required you will be able to put these to good use in the public growing spaces- you don't even need your own garden!
